

Setting Up a Project in binni Concrete

Welcome to binni! Now that you have created a user there are a few easy steps that will need to be taken to create and setup your first project.

Existing Project Set Up

Once you have completed the new project form (or if it has already been completed by the binni team prior to you logging on) the new project will be found on the binni Concrete landing page.

Step 1: Click on your project which will bring you to the Scheduled Pours page.

Step 2: Click on the menu icon located in the upper left-hand corner and then click on settings.

Here you will find the project settings such as Concrete Suppliers, Mix Designs, Authorized Users, etc.

Step 3: Click on the “+” symbol for each category and populate all applicable fields.

Your project is now setup and you are ready to schedule a pour!

Please don't hesitate to reach out with any questions to info@binni.co
